

Universal Design for Learning

Friday March 15th 9:30 AM TO 11:30 AM

Miramar College High Tech Center L 102

Universal Design for Learning Flex #70968

The relevance and importance of Universal Design for Learning (UDL) to college curriculum and programs is gaining momentum as institutions: (a) work to meet the accessibility mandates of Section 508 of the Rehabilitation Act; (b) deliver more courses via distance and blended learning; and (c) conceptualize and address student learning outcomes. Is it conceivable that a course can be designed to reach students with varied learning styles and strengths?

This training will explore the practical and concrete applications of UDL principles to curriculum and program design for on campus and online classes.

Mari Guillermo, Ed.D.

Project Coordinator, Disability & Diversity Project SDSU

Rechelle Mojica, M.S.,CRC

Access Technology Specialist, Miramar College
